

NOBCChE®

# *Sustainable Momentum*

Building Connections from Lab to Life

**September 30 - October 3**

Rosen Shingle Creek Orlando, FL

# Sustainable Momentum....

## Building Connections from Lab to Life

As NOBCChE moves into its second half century in 2024, we are building on the tremendous achievements of the past 50 years. The support of our corporate and academic partners led to a record-setting 50th Anniversary conference last year.

Our goal this year is to work with you to sustain that momentum as we continue to work toward developing an eminent cadre of people of color in chemistry and chemical engineering.

### Focus

Our critical investment areas remain the same including:

- Cultivating opportunities for engagement and development for the NOBCChE community,
- Creating scholarship opportunities to support students at each level of higher education, and
- Investing in supporting early career professionals for retained success in the STEM workforce.

NOBCChE's 51st Annual Conference will be held September 30-October 3, 2024 at the Rosen Shingle Creek in Orlando, Florida. Below is an overview of the sponsorship levels and associated benefits.
