

National Organization for the Professional Advancement
of Black Chemists and Chemical Engineers

NOBCChE is dedicated to the development of chemists and chemical engineers at the student and professional level. NOBCChE also works with K-12 educators to create interest in the sciences at an early age.

The capstone event for NOBCChE is our annual meeting, where attendees present their research, network with one another, and participate in our Career Fair to find internships, summer research opportunities, and full- time employment.

NOBCChE Sponsors from the 2024 conference include:

3M

American Chemical Society

Abbvie

Bristol Myers
Squibb

Colgate

Corteva

Eli Lilly and
Company

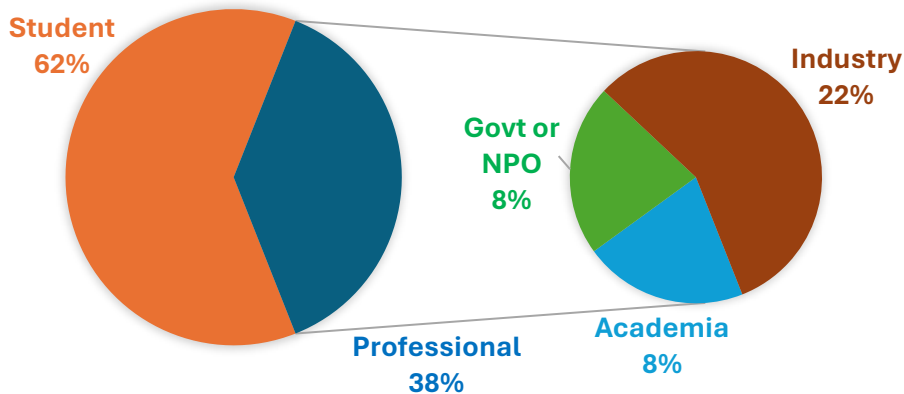

Merck

Pfizer

SC Johnson

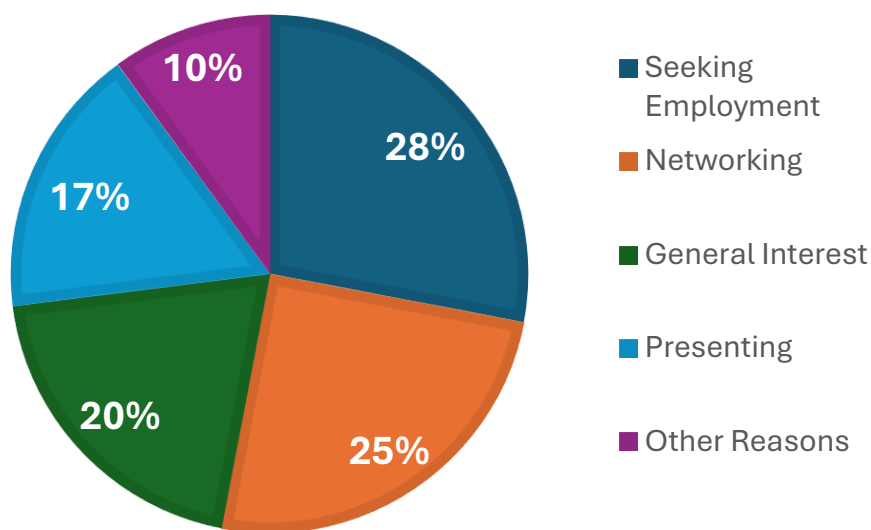

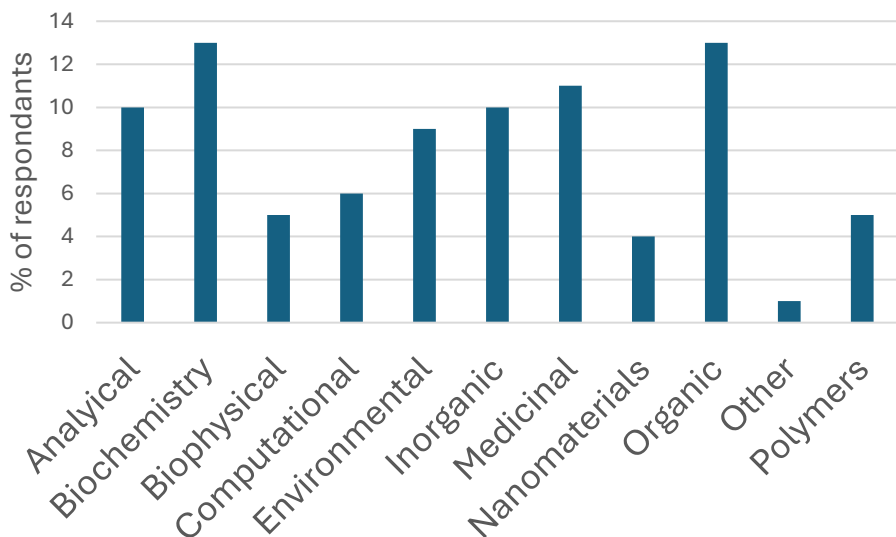

Many student attendees are supported through the competitive **Advancing Science Conference Grant**, funded through the contributions of our sponsors. Last year we funded 485 students.

In exchange for sponsorship support, companies gain access to NOBCChE's **Resume Database** of conference attendees, and many other benefits outlined in the sponsorship Prospectus.

NOBCChE's membership pool includes **5,866** members. Many are students who are supported by the ASCG. Of our professionals, over half are from industry.

Our membership has broad coverage across the chemical disciplines, with strong representation in synthetic and biological fields.

Many of our attendees at the national meetings come to interact with our exhibitors and sponsors, either to network or to find employment.
